- Web Design

Education

University of Delaware

Bachelors of Fine Arts,
Visual Communications

Minor: Interactive Media
Class of 2018

London Study Abroad, Summer 2017

5 weeks of exploring London, England and experiencing the different type of design they do across the pond. Had the opportunity to gain advice from many top notch people in the industry. Also presented two different briefs for R/GA and J. Walter Thompson. It was a once in a lifetime experience both professionally and personally.

About

My name is Nick Valent, and I am an aspiring designer. I like to work across many different mediums, and try out as many styles as I can. I also love when I get to think conceptually and abstractly when approaching projects.

Organizations

Visual Commintations Club (LBO)

Member Aug. 2015- present

Student run club on campus that increases the outreach between the students in the VC Program.

Experience

Star Army Navy Inc.

A family business that I have worked at since I was 16. This establishment specializes in screenprinting, embroidery, logo design, and working with clients. There I often worked across multiple fields, from designing logos, creating the merchandise, and working directly with clients. Working there has given me a strong sense of responsibility and has shaped my strong work ethic.
